

# Architectural Trims

*The Choice of Professionals*

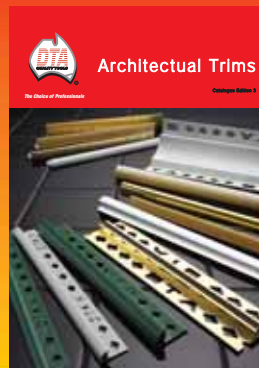

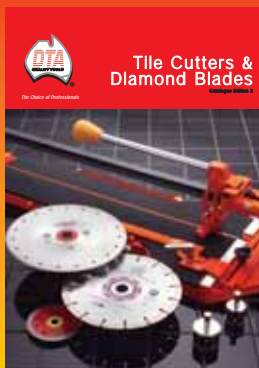

Catalogue Edition 3

***The Choice of Professionals***

Trims are an essential element in delivering a professionally finished project and DTA Trims are the recognised industry standard. Many DTA trims are manufactured in Australia using local and imported materials, while others are fully imported. Regardless of whether a trim is manufactured here or imported, DTA ensure they market and maintain the highest quality product standards. DTA's market leadership is the result of a quality product range developed through consultation with the trade in Australia and internationally. Through extensive research in both European and Asian markets, DTA are able to offer a range of trims in suitable materials, that satisfy the most demanding customer applications. Most DTA trims will be in stock at retailers, or supplied from the DTA state warehouses. More specialised profiles can be supplied with a phone call to a DTA state office.

# DTA Trim Manufacturing and Distribution

DTA manufacture in Australia and import tile trims from all over the world. DTA select the best and most appropriate profiles and materials to ensure you the customer gets the best possible trim at the right cost for your application. DTA Trim manufacture is carried out at DTA's Chelsea Heights headquarters and is quality checked and dispatched to customers all over Australia. Materials used are brass, aluminium, stainless steel and PVC. DTA always welcome customer feedback in developing new trim products and recommended usages.

## Benefits of Various Materials

**STAINLESS STEEL**  
*Grade 304 and 316L (Marine Grade)*  
*Ideal for coastal areas*

Highly recommended for public and high traffic areas due to mechanical strength and chemical resistance. It is used in many architectural and technical applications.

**BRASS**  
*Grade C380*

Brass is an elegant material and is highly regarded by architects and interior designers. It is best for indoor applications. It is best suited to indoor application. It has a warm gold colour.

**ALUMINIUM**  
*Grade 6063T5 (Plain & Anodised)*  
Aluminium has a wide variety of applications and is sought after for range of profiles and complex shapes, lightweight, ductility and ease of cutting and use. Also DTA offer many variants of finish, including bright and matt colour anodising.

**PVC**  
*UV Stabilised*

A remarkably versatile material that has found wide ranging applications in many building projects because of its corrosion resistance. Available in many designer colours. It is economical and easy to use. Not recommended for external use.

Whatever your requirement we feel there will be a DTA trim that is perfect for the application. Please contact DTA Australia to discuss your needs.

### Handy Hints

Always remove excess grout immediately after grouting to avoid discolouration.

# PVC ROUND EDGE TRIM

External Corner Trim - Horizontal

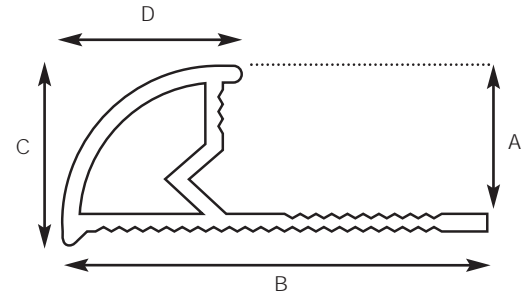

External Corner Trim - Vertical

Finishing Trim

- PVC round edge trim.
- Professional looking quadrant finish.
- Highest grade PVCU construction.
- Use with all tile types.
- Available in 17 fashionable colours.

# TRIMS MERCHANDISING MATERIAL

DTA offer our resellers a number of versatile display options. We have display stands that are suitable for wall mounting, or floor display. Regardless of the size of your retail area, a DTA Trim stand is the best way to display and maintain stock levels of your range of DTA Trims. A DTA Trim Stand enables easy customer comparison and selection of the best trim for the project. In larger stores, trims can be segmented and displayed on multiple stands, allowing separate display of metals and PVC. Please call your DTA representative to discuss the most suitable package for your retail needs.
